EXPERIMENTS DONE IN ESSENCE CHEMISTRY

by Marcel Vogel

Essence Chemistry may be defined as the radiation that each solid emits personifying the characteristic patterns of its form and the chemical activity of the pendant group responsible for the relationship with other species or form.

To effect this type of chemistry, a CARRIER WAVE is required to transport these vibrations.

This "carrier wave" must have a coherency to it so as not to mingle with the radiations emitted from the target material but act now as a differentiating transport vehicle. The quartz crystal cut in the dipyramidal shape provides such an instrument.

The radiation is etheric (the substance from which all matter evolves). The primary source is a living being - preferably human. Breath control is the means of evoking this change.

The radiation penetrates through the crystal from the finger tips (see DIAGRAM #1). The next stage is a vibratory oscillation which builds a coher-

ent field of energy (see DIAGRAM #2). A sample placed in the point of focus of the radiation will transfer its radiational field to the primary field and the two will be carried out from the tip of the crystal (see DIAGRAM #3).

The coherent field carries the vibration of the reference material at position A without interfering or blending - this is the discovery - to use a coherent pulsing field as a vehicle to transport the characteristic vibrational spectra form essence of a substance.

By this means a treatment can be affected in the body of a human being with none of the normal side effects. The treatment can be implanted with a device of this type. The treatment can be removed with a similar device.

In October, 1983, in the home of a clinical psychologist, an experiment of this type was done. The substance used was a Quaalude tablet which is a type of relaxant or sleeping pill.

Two forms of treatment were done using first a 4-sided double terminated quartz crystal with a hole drilled in it for a specimen of the pill; and second a

4-sided double terminated quartz crystal with no hole cut in it.

I began by placing a microscopic fragment of the Quaalude tablet in the cavity of the crystal which was made especially for this type of experiment (see DIAGRAM #4). I took a fragment into my mouth to experience, at a subtle level, the vibration.

DIAGRAM #1
Radiation penetrates through the crystal from the finger tips.

The top of the crystal was then wet with spittle over the hole and the index finger positioned on the spot. The right hand was used.

The entry site in the subject was the chest at a point midway between the shoulders and five inches down from the throat (the witness area). The crystal was held at about 2 inches from the

body and held steady and slowly rotated until a vibration was felt in my left hand being used as a sensor.

At that moment I pulsed my breath and, in my mind's eye, saw lights flashing. They were colored a bluish green and were streaming out from the top.

My left hand was opposing the crystal over the subject's right shoulder. When I saw these flashing lights, a pulsation was experienced in my left hand. The subject's body immediately relaxed, his eyes were closed and I asked him what he was experiencing. He responded that he was sleepy. I then asked him if this was similar to what he would normally experience. He replied that it was, although weaker.

The normal healing crystal, without the inserted cavity, was then used and a treatment was again given. This time I saw lights but the subject experienced flashing lights in his mind. Now he showed deep euphoria, his eyes closed and he was asleep.

I sat down for 5 minutes next to him to observe. There was no movement in his body. The healing crystal was then cleaned, cleared and applied to the same area, my breath withdrawn, pulsed and cleared.

Immediately the subject opened

THE EFFECT ON THE INFORMATION BODY OF VARIOUS CHEMICALS, DRUGS AND METALS

EXPERIMENT #83

Materials Required:

Small pieces of copper,
iron, mercury, lead
and tin

Tissue paper

Notebook

Color swatches (from a
paint store, or made
from a water color
set, paper or fabric)

Prescription drugs

An assistant

Take the samples of metals and wrap them individually in tissue paper so that they are not visible to the eye. Give each sample a number. Note in a notebook the appropriate metal which corresponds with each number. Obtain a set of color swatches. Wrap a pill or capsule from each bottle of prescription drugs in a piece of tissue and assign each a number.

The object of this experiment is to test the different effects of these various items on a subject as each sample is placed on the witness area (thymus gland), breathing in and testing each by use of kinesiology. Run through the metals and the prescription drugs.

(continued on page 4)

(continued from page 3)

Where there is weakening, pick up a color and place it on the back of the individual at the height of the witness area and see if this weakening is neutralized by a color. You will be surprised how effective certain colors are.

Next have the subject sit down with her/his legs extended and place those values which have shown a weakening action on the thymus area and observe the effect on the length of the legs (one leg will shrink back).

While the subject holds a weakening object in place, bring a corresponding color in opposition to the substance held on the thymus.

Colors, including the colors of our clothing, have a tremendous therapeutic action on the information body keeping it whole against many forces which would normally detract, weaken and pull it down.

WE ARE LOOKING FOR CURRENT DISTRIBUTORS OF EUROPEAN VERSIONS OF OUR VIDEOS. WE WANT TO ADVERTISE THEIR WHEREABOUTS FOR OUR FOREIGN SUBSCRIBERS. THANKS.

WE ARE HOPING TO SEE THE AVAILABILITY OF MARCEL'S BOOK, ENTITLED "MARCEL VOGEL: ON CRYSTALS," IN MID 1991.

EXPERIMENT #84

Materials Required:

*Same as above
Vogel-Cut™ Medallion
Coffee, tea, sugar*

Expand the previous experiment using a medallion. Go through the same testing of metals and drugs while wearing the medallion and observe the shielding and protection it provides to your body. In addition, try coffee, teas, even sugars.

The medallion is designed to maintain the integrity of the body under many adverse conditions, allowing the body to return to a normal, balanced level.

IN A MATTER OF JUST A FEW MONTHS THE HOLIDAY SEASON WILL BE UPON US. OUR CLEAR CRYSTAL QUARTZ MEDALLIONS MAKE BEAUTIFUL GIFTS. IN ADDITION TO BEING STUNNING PIECES OF JEWELRY, THEY PROVIDE PROTECTION TO THE WEARER FROM UNWANTED ENERGIES. CUT IN THE SHAPE OF A TRIANGLE AND WORN OVER THE WITNESS AREA (THYMUS GLAND), THE MEDALLION MAY BE PROGRAMMED WITH ANY THOUGHT OR INTENTION. A DROP OF A FLOWER ESSENCE, A HOMEOPATHIC REMEDY OR SUCH CAN BE PLACED ON THE MEDALLION AND IT WILL RADIATE ITS ESSENCE THROUGHOUT THE BODY.

A.T. & T. DONATION TO P.R.I.

A.T.&T. has created a fund-raising program whereby those who sign up with A.T.&T. for their long distance telephone service become instant donors to the Marcel Vogel Research Endowment Fund.

This is how it works. Five per cent of revenues received by A.T.&T. for long distance calls made by those enrolled in this program are automatically transferred into our Endowment Fund. If you sign up for this program, a portion of your long distance bill will be received by P.R.I. for as long as you choose to participate in the program.

When one changes long distance phone service to A.T.&T. with this fundraiser, billing is reduced approximately 15-35% over other long distance carrier's rates (this change can be done at no cost and we can provide the necessary forms). A.T.&T. also guarantees the lowest rates of all the long distance carriers with this particular service.

This is an effortless way to make cash contributions to P.R.I. without affecting your budget. We will be doing a mailing about this proposal soon, and hope you will sign up. Feel free to request forms ahead of time, or for your friends. In addition to saving you money, you will be funding a very worthwhile cause, the continuation and advancement of subtle energy research as spearheaded by Marcel Vogel. J.G.

THE GALILEO OF THE MICROSCOPE, (The Life and Trials of Gaston Naessens), by Christopher Bird, Les Presses de l'Universite de la Personne Inc., 2 Desaulniers Blvd., St. Lambert, Quebec, Canada, J4P 1L2, 1990.

This is a wonderful book about the story of the life of Gaston Naessens, considered a maverick of the microscope by some and a fraud by others. It is about Naessens' criminal trial that took place in Canada from November to December, 1989.

It is unbelievable that in this day and age a dedicated man of the caliber of Gaston Naessens

would still be under attack.

I had the opportunity of meeting with Naessens and working with his microscope and can attest to the truth of what he has stated about the structures he sees under his microscope. I, too, have seen them and recognize the brilliant insight, dedication and genius of this kind and loving man.

THE MAKING OF A VOGEL-CUT™ CRYSTAL

by Katy Salazar

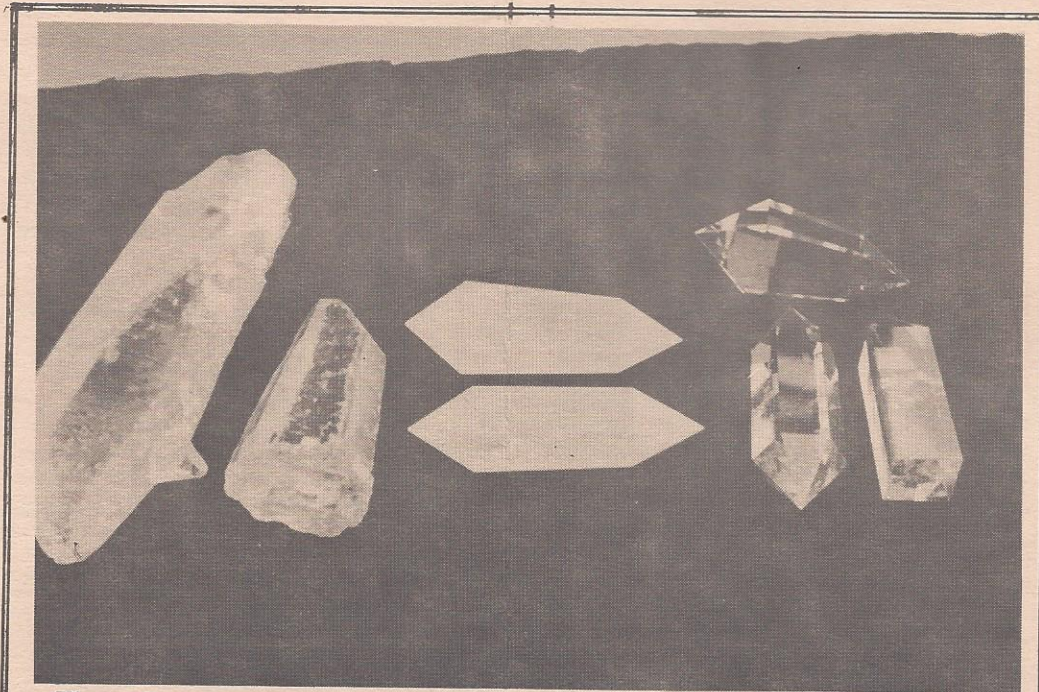

It isn't just a job and it isn't just a skill. For Drew Tousley, P.R.I.'s primary crystal cutter and Gil Daniels, cutting and shaping Vogel-Cut™ crystals is also an art.

Drew began his crystal cutting apprenticeship with Marcel's son, Marcel, Jr. five years ago. At that time the crystal cutting workshop was in Marcel's garage.

Since then Drew has worked on improving the techniques he originally learned and with the help

of Gil Daniels, works on creating more efficient methods of cutting crystals for P.R.I. Gil, who was taught by Drew, has been with P.R.I. for over 3 years.

Within the last five years the variety, availability and quality of Vogel-Cut™ crystals has increased. The most popular, and those which are cut by Drew and Gil, include the triangular shaped medallion, meditation and healing crystals. All crystal designs are the result of hundreds

of hours of research and development by Marcel Vogel and his staff.

Vogel-Cut™ healing crystals, for example, are unusual in that they are specially tuned transceivers designed to utilize pyramidal angle energies with symmetrical faces. The tips are custom tuned to resonate to the water molecule and to the individual who will use the crystal.

Because the cutting and shaping of crystals creates a lot of dust and noise, the cutting workshop is not located with the P.R.I. offices and research laboratory.

P.R.I. purchases only the best raw quartz crystal. This raw crystal, also called a blank, is cut to rough shape on the Trim Saw (see photo).

Raw crystal, also called a blank, is cut to rough shape using the Trim Saw.

The rough shaped blank is then moved to the Lapping Machine where it undergoes grinding, additional shaping, cleaning and fine tuning (see photos). Lastly, the crystals are polished using the Polishing Unit (see photo).

Drew Tousley gives additional shape to a crystal on one of the Lapping Units. Water is required when using these tools.

SELF-HEALING WITH A VOGEL-CUT™ HEALING CRYSTAL

by Marcel Vogel

To clear and make the crystal your own, take a big breath, draw it in, hold the crystal in your right hand, create the thought of clearing the crystal, and pulse your breath through your nostrils and the deed is done. The crystal is now yours.

Now to program the crystal, focus on the crystal with the thought of love and well-being. Draw your breath in slowly and let it out into the crystal. The crystal is now charged with your vibrations. Clearing and charging is strictly a function of the intention of the operator and requires no other ceremony such as soaking in seawater, light or other such actions. I have tested thousands of times in our laboratory.

In regards to healing yourself, you can complete the process by doing the following: hold the crystal in both hands with the acute angle (the longest pointed angle), facing upward. Hold the crystal at waist high level with thumb and forefinger of each hand on the crystal. Draw your breath in and as you release your breath, release thoughts of well-being and wholeness into your body. Do this until you feel your body and mind in a state of balance and peace.

Next, ask yourself "what is the root cause of my illness?" Pose the question and be totally honest with your inner self. Let the image, whatever it is, form in your mind. Repeat the question until an answer comes. When the

feeling has emerged to consciousness, draw your breath in deeply and pulse it out through your nostrils with the intention of releasing these images. Release! Release! Release!

Do it three times and then forgive yourself and love yourself. Draw your breath in with love and heal the wounds that have resulted from these openings and feel again your body at peace.

Clear the crystal with intention and breath. Put it down and drink plenty of water, slowly at first. The water will wash away all the toxins you had been holding in your cells that you just released.

This exercise will have a profound effect on your whole body-its chemistry, bloodstream and electrophysiology. You may wish to allow yourself some time and then, according to your health, get a check-up by your doctor.

THE POWER OF FEAR

When Marcel shared with me a problem he had experienced with one of his experiments, he presented me with a solution to a similar problem I had been experiencing.

He realized that just the thought of needing a control was enough to influence his very sensitive readings, and that his thought had intruded into the experiment to create that reality for him.

It was of great comfort and reassurance to me when I discovered that his solution could solve my problem, as well. As one of his certified instructors and a healer to whom a 6-sided Vogel-Cut™ healing crystal is a frequent tool, I have needed to use dowsing rods on a regular basis.

About a month and a half ago, it was with considerable concern and much confusion that I discovered that no matter what I did, I could not bring myself into

balance to get reliable readings from my rods. I tried fruitlessly to balance myself with the crystal using a self healing technique, have another person trained in the process do a healing on me, breathe deeply with the crystal over my thymus while trying to use one rod, and even hug my favorite tree.

I was at my wit's end, knowing I would never be able to give a seminar in this condition and doubting that I would be effective in facilitating a healing.

The beauty of the solution was its very simplicity and it held a profound lesson as well in reviewing what had been happening in my life at the time of this imbalance. I realized I had indeed become imbalanced, by fear.

I had begun experiencing a severe financial crunch due to having relocated from Anchorage, AK., and the more severe it got, the more fearful I became. By this very fear I had created self doubt of my abilities to make myself materially secure and I had programmed myself into imbalance and an inability to use my dowsing rods.

It was with joy that I awoke this morning with the certainty of knowing that I could clear myself of this imbalance and, sure enough, my dowsing rods responded with their definite action of old.
